

October 6, 1981

Memo to File:

RE: Great National Corporation
EXP/007/017 **4016**
Carbon County, Utah

Tom Tetting, Wayne Hedberg, Everitt Hooper and Mary Bosworth of the Division inspected exploration drillsites on October 1, 1981. Hole Numbers 8 and 9 were found to be abandoned in an unsatisfactory condition. Photographs were taken. Drilling fluid pits were still in existence and plastic liners were left in place. Trash (buckets, cans, paper, plastic, etc.) was in the pits and a metal tool box abandoned on the side. A small drill hole or depression remained on site #8. Other drill sites on the county road were searched for but not located.

A letter has been addressed to Great National's legal representatives, Finlinson and Finlinson requesting that the sites be regraded. In addition, a request to answer an original request regarding reclamation procedures sent by Tom Suchoski, on August 4, 1980, was sent to Fred Finlinson.
